

3772-19-04 Commission surveillance room and on-site facilities.

(A) The casino operator shall have a commission surveillance room at the casino facility for the exclusive use of the commission's agents to monitor and record activity at the casino facility. The Commission shall designate and approve the location and size of the commission surveillance room.

(B) The commission surveillance room shall have at least two separate workstations approved by the commission, each with multiple monitors, and shall have appropriate switching capabilities to ensure that all surveillance cameras are accessible to monitor in the commission surveillance room. The commission's agent shall have total control to determine what is visible on the monitors located in the commission surveillance room.

(C) The casino operator shall provide on-site commission facilities at the casino facility for the exclusive use of the commission's agents. These rooms shall be separate and secure and be in addition to the commission surveillance room. The commission shall designate and approve the location and size of the on-site Commission facilities.

(D) The casino operator shall provide separate telephone and internet communication systems for use by the commission's agents as approved by the commission.
