

3772-19-05 Casino surveillance room.

(A) The surveillance system for all licensed casino facilities shall be maintained and operated from the casino surveillance room. All equipment that is utilized to monitor or record must remain solely accessible to the casino surveillance room personnel and exclusively for casino facility surveillance, except when equipment is being repaired or replaced.

(B) The entrance to the casino surveillance room must be located so that it is not readily accessible by either casino employees who work primarily on the casino floor or the general public.

(C) Access to the casino surveillance room must be limited to surveillance personnel. Any agent of the commission must be provided access to the surveillance room immediately upon request and presentation of proper identification. Other persons may only enter the casino surveillance room after obtaining specific authorization by the director of surveillance and by the commission or a commission agent.

(D) The casino surveillance room must be staffed by at least two surveillance employees at all times. The minimum casino surveillance room staffing may be increased at the discretion of the commission.
