Chris,

Please see below for my answers.

I'm answering the questions based on a more mature operation than what we are running today. I believe we will be pretty active over the next 90-180 days with free conversions as we adjust or mix.

Hope this is what you are looking for.

Roger

Subject: Slot statistics

Hi Roger,

I am putting together some statistical information regarding slot machine installations and conversions and was wondering if you would mind answering a couple of questions?

1. On average how many slot machines will you purchase (new or used) in a year? For a mature casino floor I would ask to replace 10% of my floor a year.
2. What would be the average cost of a slot machine? 18.5k
3. On average how many conversion kits will you purchase (new or used) in a year? I would expect to convert at least 12-15% of my floor per year.
4. What would be the average cost of a conversion kit? 3.5k

Thanks in advance for your assistance.

Thanks,
